

Underwater Pond Pictures

Here are just a few pictures taken underwater in my pond using a Crosstour action camera.

Please note that prior to these pictures being taken, a [major pond clean](#) was completed; mainly the removal of pebbles and rocks. It is somewhat barren at the moment but hopefully by next year it will be far busier.

If you'd like to download **larger versions** of these images, then choose either [pond_pics_2023-09-29.tar.gz](#) or [pond_pics_2023-09-29.zip](#).

Hint: You might see a couple of creatures in the **west side** images which are the last two on this page.
